PROJECT

Software Development Engineer

Carnation Infotech Pvt. Ltd. | 2024 – Present

- Developed scalable REST APIs for business-critical modules using Java and Spring Boot.
- Designed and implemented asynchronous document processing workflows using Kafka, improving system efficiency.
- Integrated Redis caching, reducing database load by 30% and improving response time.
- Created and maintained Swagger/OpenAPI documentation for API endpoints.
- Worked on microservices-based architecture, deployments, and Agile sprint cycles.
- Resolved production issues for B2B applications under strict SLAs through log analysis and RCA.

System Engineer

Tata Consultancy Services (TCS) | 2021 – 2023

- Developed and supported backend components for semiconductor systems using Java and Spring Boot.
- Built RESTful APIs and integrated with MySQL, JDBC, and Hibernate ORM.
- Provided L2/L3 production support, enhancing system uptime and minimizing service disruptions.
- Performed root cause analysis, log investigation, and implemented permanent fixes.
- Collaborated in Agile/Scrum teams using JIRA, Git, Bitbucket, and ServiceNow.
