EDUCATION

Adamas University August 2022 - July 2025
B.Tech in Computer Science and Engineering (Lateral Entry) CGPA 8.82/10.0

Brainware University August 2019 - July 2022
Diploma in Computer Science and Engineering CGPA 9.90/10.0

EXPERIENCE

SDE-1 August 2025 - Present
Prantae Solutions Bhubaneswar, Odisha

- Led the end-to-end development of a full scale ERP system from scratch and continue to maintain and scale it. Built using Django, MySQL and React delivering around 16 integrated applications. Improved operational efficiency by 40%, with adoption across 95% of internal teams.
- Developed a full-fledged Task Management System and implemented the complete production workflow for devices, including end-to-end inventory management. Additionally, built and optimized the sales lead management application, driving a 30-40% increase in flagship device sales through improved lead tracking and conversion efficiency.

QE Intern April 2025 - July 2025
JUSPAY Kolkata, India

- Designed and executed automated test cases using Selenium and Python, increasing test coverage across key modules such as Marketplace, Onboarding Assistant, and Payment Links, resulting in a 15% reduction in manual testing effort and faster release cycles.

Web Development Intern April 2024 - August 2024
Vraio Software Solutions Private Limited Remote

- Built and maintained the front-end for a live project serving 1,000+ daily users, using React and Tailwind CSS, which improved user experience by reducing page load time by 20% and enhancing responsiveness across various devices.

PROJECTS

1. Wastewise

Project Link: [Github](#) Live Link: [Wastewise](#)

- Developed a web applications for efficient waste schedule pickup management using React, Tailwind CSS, Node.js, Express and MongoDB.
- Integrated real-time tracking features and added automated scheduling, enhancing operational efficiency by 30%.

2. AutoHire

Project Link: [Github](#)

- Engineered an AI-powered solution using Python, scikit-learn, and TF-IDF vectorization to automatically match resumes with job descriptions through multi-dimensional scoring (skills, experience, location, role similarity, education), achieving a match accuracy score of 0.82 and reducing manual screening effort
- Applied advanced feature engineering and clustering mechanisms that categorize candidates into high/medium/low match groups, enabling recruiters to efficiently identify the most promising talent.

3. Job Sentiment Analysis

Project Link: [Github](#)

- Constructed a web application using Python's Flask framework and Hugging Face's Transformers library to perform sentiment analysis, summarization, and key information extraction from job descriptions.
- Integrated modules for sentiment grading, shortening lengthy job descriptions by 60-70% without loss of context, and extracting essential job attributes, enabling users to analyze roles in under 10 seconds per description.

TECHNICAL SKILLS

Languages: JAVA, JavaScript, TypeScript, Python

Frameworks & Libraries: Django, React, Tailwind CSS

Databases: PostgreSQL, MySQL

Tools: Github, Git, Docker, AWS, Vercel, Postman

Other: REST API, Data Structure and Algorithms, System Design

LANGUAGES

English, Hindi, Bengali
