LinkedIn: <https://www.linkedin.com/in/abhijeet-narula> | **GitHub:** github.com/abhijeet-narula | **Location:** Remote, APAC | Open to relocate to EU (immediately) | **Work authorization:** Non-EU citizen – Eligible for EU Blue Card; Degree-qualified and previously travelled on Schengen business visas to Germany (Uniper, Düsseldorf) | **Languages:** English (Fluent), Hindi (native); German (learning)

Professional Summary

Senior Backend Engineer with 5+ years architecting scalable distributed systems and streaming platforms. Proficient in Kafka, Flink, Spring Boot, Microservices, REST APIs, Docker and Kubernetes. Proven track record delivering mission-critical solutions in enterprise environments with measurable business impact.

Professional Experience

Software Engineer | Optum, UnitedHealth Group, Gurugram | July 2020 – Feb 2025

- Architected Spring Boot microservices + REST APIs for real-time Kafka streaming consumed by 6+ teams. Developed Power BI dashboards; orchestrated Docker/Kubernetes with Argo CI/CD. Reduced deployment efforts 60% via infrastructure standardization
- Built a Python/Flask REST API for a speech-to-text hackathon project, applying NLP and regex to extract information from unstructured text and return structured responses
- Optimized API response times to sub-second via concurrent processing and caching. Led process redesign saving \$340K annually. Implemented CDC via Snowflake Streams/Merges for real-time analytics updates
- Migrated legacy web-services to microservices architecture; eliminated security gaps; streamlined deployments. Integrated Splunk for real-time monitoring and anomaly alerting

Senior Technical Consultant | Uniper IT, India Office | Feb 2025 – Present

- Serving as an Individual Contributor and Backend Developer for the LNG Nomination application, developing Python Flask-based REST APIs and supporting a React frontend.

- Working closely with cross-functional teams to support production systems.
- Designed and implemented scripts in Energy Trading Platform (Java, SQL) to generate monthly gas storage reports (injections, withdrawals, adjustments, balances) with dynamic parameter-driven column addition, to handle millions of deals with low latency and no UI lag. Redesigned legacy scripts enabling dynamic column addition without code changes; reduced production incidents by 30%
- Designed Spring Boot + Apache Camel POC for JSON to Kafka ingestion with Apache Flink aggregation; Docker Compose infrastructure. Also worked on LLM integrations into scalable backend systems and APIs

Technical Skills

Languages: Java, SQL(PostgreSQL), Python, GraphQL, JVM, React

Streaming & Messaging: Kafka, Flink, Camel, JMS

Frameworks: Spring Boot, Hibernate, Redis, Flask, PySpark, Maven, Apache Spark

Cloud: Microsoft Azure (AKS), GCP(Dataflows, Composer), AWS (S3, Lambda)

DevOps: Docker, Kubernetes, GitHub Actions, Jenkins, Argo CI/CD

Data & Analytics: Snowflake, Power BI, Splunk, Change Data Capture, NoSQL

Security/ AI: API Gateway, CodeQL, Defender, Vault, Copilot, LangGraph, LangChain

Testing: Postman, Junit, Mockito

Education

B.Tech | Delhi Technological University (Formerly Delhi College of Engineering) | 2016–2020 | GPA: 7.65/10

Senior Secondary Certificate (Science) | Shah International School, New Delhi | 2016 | Score: 96%

Certifications & Achievements

- Microsoft Azure Data Analyst Associate (2023)
- Microsoft Azure Data Fundamentals (2022)
- TechGig Code Gladiators Finalist (2021) – Top 0.5% nationwide
- Optum ECT Global Hackathon Team Leader (2022)
