SUMMARY

Java Backend Engineer with 10+ years of experience designing, developing, and deploying scalable Java-based enterprise applications and microservices across the full Software Development Lifecycle (SDLC). Proficient in Spring Boot, Spring Cloud, Quarkus and REST APIs. Experienced in Agile/Scrum methodologies and distributed systems architecture. Proven track record of improving system performance, reducing production defects, and delivering high-quality backend solutions in fast-paced enterprise environments.

TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Spring Boot, Quarkus, Spring Cloud, Hibernate

Architecture: Microservices, Event-Driven Architecture, REST APIs, API Gateway

Databases: MySQL, Microsoft SQL Server

Messaging: Apache Kafka

Cloud: AWS

Testing: JUnit, Mockito, Integration Testing

Observability: Splunk, Datadog

Build Tools: Maven, Gradle

Tools & Platforms: JIRA, Postman, IntelliJ IDEA, Eclipse, STS

EXPERIENCE

Principal Consultant

June 2022 – Present

Daimler Truck Innovation Center India Private Limited

Bengaluru, IND

- Led design and development of scalable microservices and REST APIs for enterprise applications.
- Improved code quality by increasing SonarQube coverage to 95%, reducing production defects and improving maintainability.
- Collaborated with business stakeholders to deliver production-ready features and enhancements.
- Built and enhanced REST API infrastructure, improving defect detection and reducing issue resolution time.
- Integrated bug fixes and feature enhancements into existing API workflows, ensuring system stability.

Senior Software Engineer

Aug 2019 – June 2022

Wipro

Bengaluru, IND

- Led migration of 15+ services from MuleSoft to Spring Boot microservices, improving scalability and reducing system complexity.
- Designed and developed REST APIs for distributed systems, improving reliability and fault tolerance.
- Participated in technical design discussions, walkthroughs, and code reviews to ensure high-quality deliverables.
- Conducted design and code reviews, improving code quality and minimizing rework across teams.
- Partnered with cross-functional teams to deliver scalable backend solutions aligned with business objectives.

Software Engineer

July 2017 – Aug 2019

Yodlee Infotech Private Limited

Bengaluru, IND

- Designed and developed Java-based backend applications using Spring MVC framework.
- Implemented layered architecture (Controller, Business, Integration), improving modularity and maintainability.
- Built validation frameworks using Spring Validator API to ensure accurate data handling.
- Developed custom exception handling mechanisms for request and response processing, improving system reliability.
- Conducted approach reviews, design reviews, and code reviews to maintain high-quality standards.
- Collaborated with business teams to understand requirements and deliver effective technical solutions.
- Participated in technical walkthroughs and contributed to design documentation.
- Managed change requests and resolved defects, ensuring smooth application functionality.

Software Engineer

June 2016 – July 2017

Zensar

Bengaluru, IND

- Delivered enterprise applications aligned with business requirements and client specifications.

- Participated in technical discussions, walkthroughs, and requirement analysis with stakeholders.
- Conducted design and code reviews to ensure high-quality and maintainable code.
- Supported UAT testing and resolved high-priority defects, improving release quality.
- Managed change requests and ensured the timely delivery of features and fixes.
- Created and reviewed technical design documents to maintain project standards.
- Provided peer review support and collaborated with team members to improve delivery timelines.

Associate Software Engineer

July 2014 – June 2016

Torry Harris Business Solutions

Bengaluru, IND

- Designed and developed application features using Java, ensuring clean, maintainable, and efficient code.
- Maintained 99.9% system uptime through proactive monitoring and timely issue resolution.
- Managed application configuration and deployment across environments, ensuring smooth and reliable releases.
- Collaborated closely with QA teams to identify, troubleshoot, and resolve defects, improving application stability.
- Provided production support and maintenance, ensuring high system availability and minimal downtime.
- Implemented business requirements into technical solutions, enhancing functionality and user experience.
- Actively contributed to code reviews and shared technical knowledge with team members to support feature development.

EDUCATION

FET Agra College

Agra, IND

B.Tech, Electronics and Communication Engineering

July 2008 – July 2012
