CAREER HIGHLIGHTS

- Over 4 years of experience as java developer with a demonstrated history of working in the information technology and services industry.
- Experience in Java Application Development.
- Strong knowledge in core and MVC architecture using spring framework and Spring Boot.
- Hands on experience on designing web services using Spring Rest.
- Experienced in an Agile,collaborative environment to receive design requirements,peer program and test applications.
- Hands on experience in developing Applications using Hibernate and JPA.
- Hands on experience on developing Microservices using Spring Cloud.

KEY SKILLS

- **Languages:** Java , C
- **Frameworks:** Spring , Spring Boot , Hibernate , JPA , Spring Cloud
- **Web Services:** REST
- **Design Architecture:** Microservices , MVC , DAO
- **Tools:** GIT, Maven , STS , Eclipse
- **Platforms:** Windows , Mac
- **Database:** MySql ,Oracle , H2
- **Testing Tools:** JUnit , Mockito
- **Message queue:** Apache Kafka

EXPERIENCE

- **Societe Generale**
Specialist Software Engineerr (Full-time) *March 2025 - Present*
 - : Responsible for API creation and Payment Data retrival/updateation.
- **Tata Consultancy Services**
System Engineer (Full-time) *August 2023 - Present*
 - : Responsible for API creation and Payment Data retrival/updateation.
- **Capgemini India Pvt Ltd**
Senior Analyst (Full-time) *March 2021 - August 2023*
 - : Responsible for creation of APIs for various clinical endpoints.

PROJECTS

- **Natwest Group (RBS)**
Tech Stack-Java,Spring Boot,Hibernate

Responsible for API creation and Payment Data retrival/updateation.

- **Roles and Responsibilities:**
 - Handled Java Application development including design and debugging of code.
 - Responsible for creation of API's using MongoDB(Single Line ,Multi Line,Raw line sub API).
 - Responsible for creating Tyk(API Gateway) to be used in DRS Aplication..
 - Assisted the team in splunk dashboard creation which enhance user experience.
 - Extensivly used core java concepts during the development of Business Logic
 - Involved in analysis,specification,design,implementation,and testing process

- **Signant Health (PMD API)**
Tech Stack-Java,Spring Boot,Hibernate

Working as backend developer. Responsible for developing API for US pharma client using Spring Boot.

- **Roles and Responsibilities:**
 - Handled Java Application development including design and debugging of code.
 - Responsible for creation of API's using graphQL Queries for various clinical endpoint.
 - Led troubleshooting,fixed bugs in java and updated sites throughout production lifecycle.

- Responsible for Unit testing and code refactoring for code improvement using sonarQube integration.
- Focusing on developing technical as well as functional understanding of the website.

- **Online Railway Reservation System**

Tech Stack-Java, Spring Boot, Microservices, Hibernate

Consists of multiple modules/applications with Spring-Boot, React, and MongoDB as the primary technologies.

- **Roles and Responsibilities:**

- Handled Java Application development including design and debugging of code.
 - Extensive project management activities included: login, New User Registration, Booking, Cancellation

EDUCATION

- **Techno Main Salt Lake**

Bachelor of Technology - Electronics and Communication, 8.20

2020

ACHIEVEMENTS

- On the spot Award by TCS.
- Super Team Award by Capgemini.
